

VPN provides a safe way to connect to the University of Calgary network from any off-campus location.

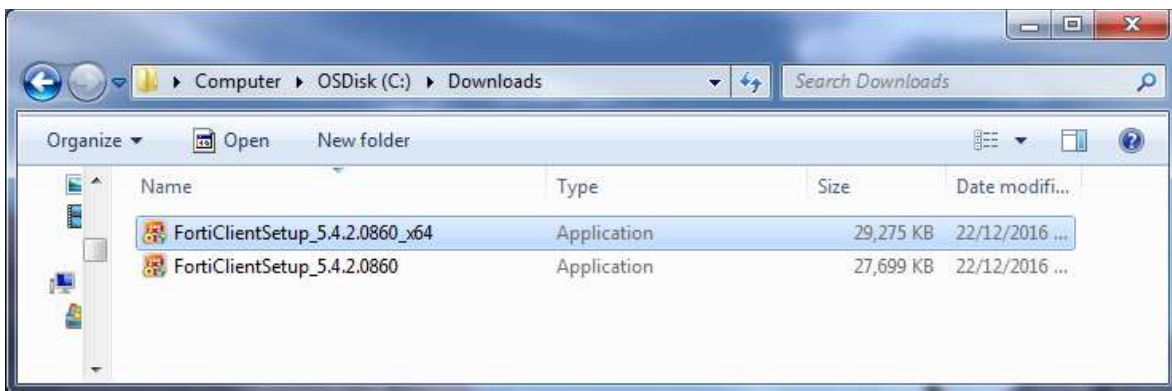

IT uses Fortinet technology for its VPN services. Fortinet provides FortiClient SSL VPN client software for Windows, Macintosh, and Linux. IT distributes these clients free of charge to members of the University community.

Configuration instructions are given in the pdf files (**Connecting-Admin-VPN.pdf** & **Connecting-General-VPN.pdf**).

Download and Installation Instructions

Download the **FortiClientSetup** installation application. Select the program suited for your Windows operating system.

- **FortiClientSetup_5.4.2.0860_x64.exe** *for Windows 64-bit*
- **FortiClientSetup_5.4.2.0860.exe** *for Windows 32-bit*

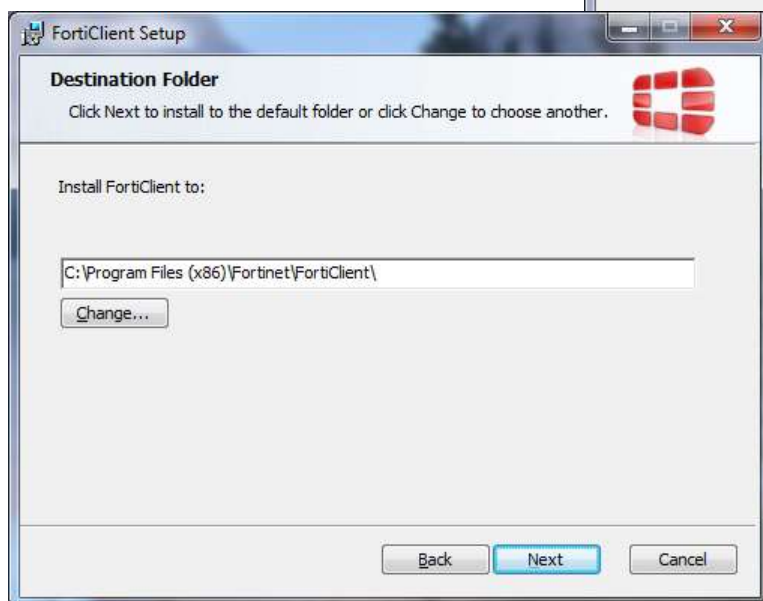

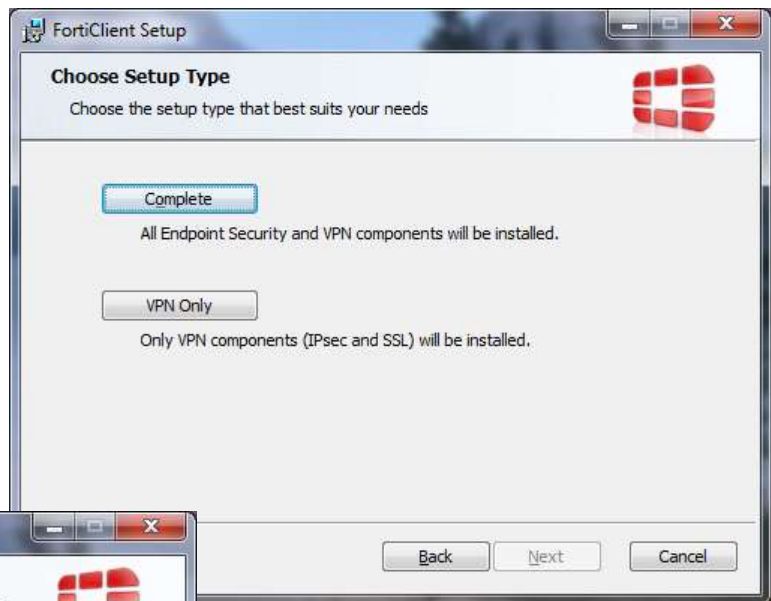

***** If you have a previous release of FortiClient you must uninstall it first. *****

Run the **FortiClientSetup** installation application as Administrator (Right click on selected application). You will be prompted to confirm that you want to run the program. The Installation Wizard will perform some checks.

You must check the box to have read and accept the terms of the License Agreement in order to select **Next** to install and use the software.

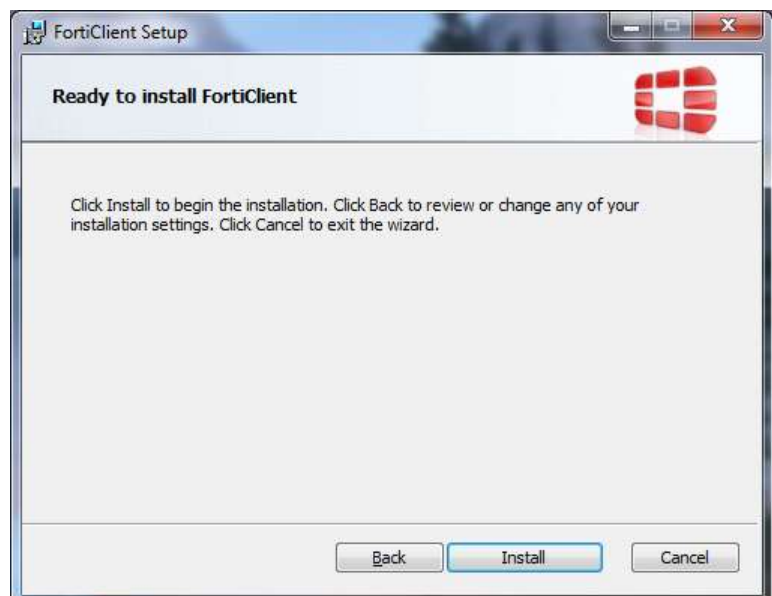

The University of Calgary is only licensed for the **VPN** software. Select **VPN Only**.

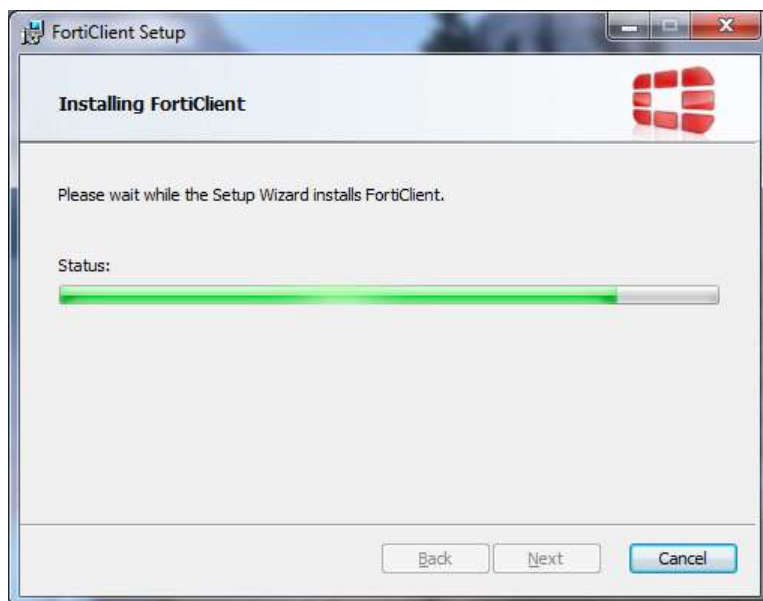

Select the Destination Folder and **Next** to proceed.

Click **Install** to begin software installation.

Progress of installation is displayed and the status of the installation when it is done.

Click **Finish** to exit the installer.

If you cannot find the **FortiClient** in your **Start** menu, Look under **All Programs** to find the **FortiClient** folder and the **FortiClient** program in this folder. You can right click and select Pin to Start menu or Pin to Task bar if you want to have easier access.

Configuring connections.

Configuration instructions are given in the pdf files to connect to the University's Admin and General Purpose VPN services.

- **Connecting-Admin-VPN.pdf**
- **Connecting-General-VPN.pdf**
